

# Robert Patch

## Full Stack Software Engineer

+16502701881 | Belmont, CA 94002 | robert.gpatch@gmail.com

**Professional Summary:** Engineering leader with 11+ years of experience delivering scalable backend and frontend systems across finance, fintech, and compliance platforms. Expert in full-stack development (React + Java/Spring Boot), secure architecture, and microservice transformation. Passionate about AI/ML systems and LLM infrastructure (RAG, vLLM, Llama.cpp, Ollama, FAISS).

**Recent outcomes:** Led transition to Spring Cloud Config Server → cut config-related latency by ~80% across middleware microservices. Decoupled monolithic middleware into 12+ isolated services → slashed onboarding wait times ~10×. Built real-time fraud tools surfacing 100s of signals → reduced manual SLAs by ~80%. Architected private LLM platform → deployed secure, offline-first document RAG app with Llama.cpp & vector embedding search

## Skills

**Languages & Frameworks:** Java, JavaScript, TypeScript, Python (Pandas, Numpy, Scikit, Pytorch), React, Angular, Railway, Render, Express, Loopback, Spring Boot, FastAPI

**AI/ML & LLM:** LangChain, Llama.cpp, vLLM, Ollama, ChromaDB, Transformers, HuggingFace, RAG, OpenAI API, Local Model / GPU Serving

**Monitoring & Observability:** Prometheus, Jaeger, Splunk, CyberArk, Grafana, OpenTelemetry, Latency Optimization

**Systems & Infrastructure:** API & System Design, Kafka, Spark, SQL, MongoDB, CI/CD, GitLab Pipelines, Helm Chart, Git, Docker, Kubernetes, OpenShift

## Employment History

### Full Stack Software Engineer — First Citizens Bank – Santa Clara, CA (2023–Present)

- Led migration to Spring Cloud Config Server, reducing config latency by ~80% across microservices.
- Delivered full-stack React + Java/Spring Boot apps for compliance/account management workflows (+25% user satisfaction).
- Built tools for KYC, IDV, EDD, FileUpload, Client Attestation, RWA, WI, and secure client onboarding flows.

### Full Stack Software Engineer — Silicon Valley Bank - Santa Clara, CA (2020–2023)

- Decoupled middleware monolith into 12+ microservices; cut onboarding wait times ~10×
- Security Champion: authored custom patch files, maintained zero critical vulnerabilities
- Shipped compliance apps (IDV, CUR, KYC) with ~98% on-time delivery

### Senior Full Stack Developer — Western Union - San Francisco, CA (2018–2020)

- Architected an Angular & Spring Boot fraud detection system, replacing a legacy JSF monolith
- Reduced fraud decision SLAs by ~80%; improved uptime ~30%
- Managed cross-timezone development with offshore teams

### Software Developer — Wells Fargo - Concord, CA (2017–2018)

- Architected Angular + Spring Boot fraud detection system, replacing legacy JSF monolith
- Reduced fraud decision SLAs by ~80%; improved uptime ~30%
- Managed cross-timezone development with offshore teams

### Java Developer Lead — Booz Allen Hamilton - Aiea, HI (2015–2017)

- Architected Angular + Spring Boot fraud detection system, replacing legacy JSF monolith
- Reduced fraud decision SLAs by ~80%; improved uptime ~30%
- Managed cross-timezone development with offshore teams

## Education

Bachelor's Degree in Computer Science, University of Hawaii at Manoa.

DataCamp - AI Engineer (Open AI)
